How deep should a server rack be?

Cabinets range from 600mm to 1200mm in depth and should be deeper than your deepest rackmount server to allow for internal working space. A two-post server rack is suitable for lightweight equipment, while 4-post server racks and cabinets come in a variety of sizes and shapes to hold a vast array of server components and devices.

What size server rack do I Need?

Server Racks come in a range of heights to suit your requirement, from 12U up to 47U. The cabinets are fitted with quick release front and rear perforated doors (approximately 60% open), fitted with lockable swing handles. The side panels can be fitted with cabinet locks.
