Our new 5 MW / 10 MWh Battery Energy Storage System is now live, engineered from the ground up in Lisburn. Our modular, off-site construction ensures a faster and smoother path to commissioning.

Bergen 10MW+ Gensets, deployed as modular building blocks are the true grid replacement option for the rapid construction of large scale Microgrids. Gensets perform equally well for continuous load ...

Vantaan Energia is building a nearly 10 megawatt-hour electricity storage at Rekola, in Vantaa, to provide rapid flexibility to the Finnish electricity system. The battery storage system will be ...

But modern energy storage cabinets from Finland are more like thermal ninjas - silent, adaptable, and built to handle extremes. Let's break down what makes them different:

While substantial financial details for the Finnish project remain undisclosed, the economic viability of battery storage is pivotal for broader adoption. Crucially, the progress in Finland could also ...

Our utility-scale energy storage seamlessly integrates with critical energy systems, driving revenue with optimised assets and delivering proven reliability, flexibility, and safety. We have over 19 GWh of ...

In this article, we explore the specifics of this 10 MW battery storage project, offering valuable insights for potential clients interested in similar investments.

We provide expertise in the surveying, construction and renovation of battery energy storage areas and road infrastructure, whether it's a larger or smaller project.

While Finnish energy storage cabins won't single-handedly solve climate change, they're proving to be crucial puzzle pieces. By addressing both environmental extremes and economic realities, this ...

10MWh Microgrid Energy Storage Battery Cabinet for Finnish Construction Site

The project aims to provide clean energy solutions for small commercial and industrial applications through a 20-foot high cabinet housing the power conversion system (PCS), capable of 100 kW ...
