What is a modular wastewater treatment plant?

The Modular Wastewater Treatment Plant represents a paradigm shift in how we approach wastewater management. Its scalability, flexibility, and cost-effectiveness make it an ideal solution for a wide range of applications, from small communities and remote areas to large industrial facilities and disaster response.

What is a wastewater treatment plant?

The overall objective of the wastewater treatment plant is to provide a wastewater treatment system capable of treating a wide range of likely wastewater conditions, while complying with the performance requirements to meet or exceed the Department of Water and Sanitation's requirements.

Why should you choose a modular wastewater treatment system?

This modularity allows for scalability, customization, and rapid deployment, making it an ideal solution for diverse wastewater treatment needs. Pretreatment Units: These units are designed to remove large debris, sand, and grit from the wastewater to prevent clogging and damage to subsequent treatment modules.

What types of wastewater treatment plants do we install?

We install onsite, modular, and scalable decentralized large-volume wastewater treatment plants (up to 2ML) for the treatment of effluent or industrial wastewater to non-potable standards.

Cape Town is leading the way in sustainability with a new R14.6 million solar project at the Kraaifontein Wastewater Treatment Plant. This initiative, part of a R20.6 million investment, is set ...

The City of Cape Town's Energy and Water and Sanitation directorates recently completed a 990kWp renewable energy project at the Kraaifontein Wastewater Treatment Plant.

In a significant stride towards sustainable energy and climate change mitigation, Cape Town has successfully completed a 990kWp renewable energy project at the Kraaifontein Wastewater ...

We combined all the parts and processes of our successful systems into one "plug & play" unit, and made this available to South Africa in an "off-the-shelf", ready to install and fully modular, waste water ...

10mwh cape town modular solar cabinet wastewater treatment plant

They embarked on combining all the parts and processes of their successful wastewater treatment plants into one "plug & play" unit, and made it available to South Africa in a fully modular packaged ...

The Aegis MBR (Membrane bioeactor) module is a rapidly deployable, modular, and scalable wastewater treatment package plant. The module uses a semipermeable membrane that filters out ...

Modular systems with biological treatment, MBRs, and chemical treatment units have been successfully implemented to achieve the required effluent quality for discharge or reuse.

Cape Town has successfully completed a 990kWp renewable energy project at the Kraaifontein Wastewater Treatment Plant, furthering its commitment to sustainable energy and ...

The City of Cape Town (CoCT) has announced the completion of a 990kWp renewable energy project at the Kraaifontein Wastewater Treatment Plant, part of a project to decrease municipal...

The project, which began construction in November 2023, is part of the city's small-scale embedded generation (SSEG) programme, which aims to reduce reliance on traditional Eskom and ...
