What is a DC series cabinet?

Our DC Series is the Data Center Standard for high-capacity, high-weight load rated, feature-rich cabinets.

How can Nucor help you build a sustainable data center?

Your collaborative partner for sustainable data center construction from design to installation. From the core and shell to the white space buildout, Nucor has the domestic steel capacity and rapid deployment building solutions to build data centers faster and more sustainably.

Are custom cabinet configurations available in IBX™; data centers?

Custom cabinet configurations available in International Business Exchange (TM) (IBX™;) data centers globally. Fully enclosed, secured, and interconnected data center environments for custom, multi-cabinet deployments. Work with our industry-leading engineering experts to design, build, and optimize your critical data center environment.

What size server & network cabinets are available?

With the most extensive array of sizes ranging from 42-52RU, heights of 600mm to 800mm (23.62" to 31.5"), and depths of 36" to 54", providing server and network cabinets that meet any specific requirements.

PRIME's Modular Data Centers are a prefabricated and efficient solution for 5G Macro Sites and Enterprise applications. The Natural Air Cooling system cuts energy costs dramatically - using 75% ...

These deployable, seismic and UL-rated cabinets are fully welded, pre-assembled, and come standard with features such as recessed PDU Cavities, and are configurable with or without doors, sides and ...

We provide the right cage, suite or server cabinet options to accommodate your equipment size, power and cooling requirements while providing layers of physical security to protect your deployment.

A highly engineered data center cabinet solution that delivers fast, built-to-order configurability, best-in-class strength, and scalability regardless of the application.

From the core and shell to the white space buildout, Nucor has the domestic steel capacity and rapid
