Designed for commercial, industrial, and microgrid applications, it integrates a 30kW PCS with a 60kWh LiFePO4 battery bank to provide safe, efficient, and reliable power storage.

Our intelligent battery swapping cabinets feature advanced charging strategies that optimize battery performance while ensuring easy maintenance and real-time fault detection.

The 360kW charging cabinet is a built-in charger for EV battery swapping station. It can achieve 6 outputs to quickly replenish energy for the battery pack.

The Base Station Energy Cabinet is a fully enclosed, weather-resistant telecom energy cabinet designed to provide reliable power distribution and battery backup for outdoor communication networks.

This cabinet integrates advanced battery technology, energy management systems, and intelligent controls, achieving efficient energy storage in a compact device.

Offering rapid battery swaps, robust power management, and compatibility with various electric vehicles, these advanced battery swap systems feature IP55-rated protection, intelligent BMS with multiple ...

From high-protection outdoor cabinets to enclosures for telecom, power, and industrial use, we offer configurable options in structure, material, thickness, and surface treatment to ensure both ...

The system is equipped with industrial computer, 21-inch touch display equipment, leakage switch, lock control equipment, automatic heat dissipation system, automatic fire ...

Innovate the modular battery swap mode of "vehicle and electricity separation". Relying on intelligent battery compartment, Internet of Things real-time monitoring system and cloud energy dispatching ...

30kW communication power supply cabinet for battery swapping station

The battery cabinet for base station is a special cabinet to provide uninterrupted power supply for communication base stations and related equipment, which can be placed with various types of lead ...
