What is an outdoor telecom enclosure?

The outdoor telecom enclosures, which are also referred to as telecommunications cabinets, are fully enclosed cabinets that help protect electrical cabling and other equipment from potentially damaging environments. Such damage can be caused by dust, rain, ice, and external heat. What do you need to know about outdoor telecom enclosures?

Which telecommunications enclosure is best for your project?

The multi-functional enclosure is specifically tailored for use in telecommunications projects. Outdoor enclosures are ideal for use outside. Rittal's CS wall-mounted enclosures and CS New Basic enclosures are available off the shelf as standard products. CS Toptec enclosures are the perfect solution for your outdoor projects.

Can telecommunication equipment survive in an outdoor enclosure?

To survive in an outdoor enclosure, your telecommunication equipment needs to have climate control. So whether you are keeping the electronic system and its components cool in the summer or warm in the winter, outfitting your electrical box with the proper heating and cooling features will protect your investment.

Can NEMA 6P enclosures be used for indoor or outdoor applications?

Technically, NEMA 6P enclosures can be used for indoor or outdoor applications because this standard safeguards the equipment from harsh weather conditions, water ingress, and water submersion. We make sure that every piece of custom electronics enclosure we produce is made with top-notch materials, such as metal and steel, to showcase durability.
