Albania is making significant strides in renewable energy, particularly through solar power projects. Here's a closer look at some of the major solar panel projects and developments in ...

Despite deriving around 95% of its electricity from renewables, Albania remains heavily dependent on hydropower, leaving it vulnerable to droughts and climate impacts. The Belshi plant ...

Net-metering is eligible for small to medium-size solar and wind systems of up to 500 kW. Certain customs duty exemptions apply for machinery and equipment used in the construction of all power ...

The article aims to offer insights into how PV systems might contribute to sustainable energy generation, grid stability, and energy management in Albania by exploring the advantages ...

While manufacturing of solar PV and wind energy technology is concentrated in a limited number of countries, solar thermal technology manufacturing has gained momentum in Albania, with several ...

On May 6, 2025, the Albanian government approved the development of two new solar power plants, totaling 54 megawatts (MW) in capacity.

Solar power accounts for 6% of electricity production in Albania. More than half of the photovoltaic output is from the Karavasta facility, the biggest of its kind in the Western Balkans.

Hydropower plants account for almost all electricity production in Albania, but the share of photovoltaics is gradually growing. Several major solar parks already online - the Karavasta facility is ...

In 2025, the Albanian energy regulator, ERE, granted a 30-year electricity generation license for Spitalla Solar, the project company created by Voltalia. This license enables the company to ...

Developed by Voltalia, the 140 MW solar park was commissioned at the end of 2023 and is expected to

Albania solar power generation system

generate 265 GWh of electricity annually -- enough to power approximately 220,000 ...
