What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

What are telecommunications enclosures?

Telecommunications enclosures are protective cabinets or racks designed to house communication equipment such as fiber optics, switches, and power systems. Their primary purpose is to shield these components from external threats, including environmental conditions, physical damage, and unauthorized access.

How do I choose a telecommunications enclosure?

Proper installation of telecommunications enclosures is essential to their performance and longevity. Select an appropriate site that meets environmental and logistical needs, whether indoors or outdoors.

Where are outdoor Telecom enclosures made?

Every outdoor telecom enclosure we manufacture is designed, fabricated, and assembled entirely in the USA. Our commitment to American manufacturing means you receive consistent quality, faster lead times, and complete Build America, Buy America (BABA) self-certification documentation with every order.
