How much thermal coal does Argentina use?

The consumption of thermal coal has decreased over the years. In 2023, Argentina consumed 0.5 million short tons of thermal coal, down from 1.9 million short tons in 2013. Because of low domestic thermal coal production, Argentina relies on importing thermal coal to meet its energy needs, with 96% of thermal coal consumption being imported in 2023.

What type of coal does Argentina use?

Argentina's coal consumption consists of thermal coal and metallurgical coal. In 2023, thermal coal accounted for 30% of the total coal demand, while metallurgical coal made up the remaining 70%. The consumption of thermal coal has decreased over the years.

What is Argentina's most famous coal-fired power plant?

Argentina's most notable coal-fired power plant is the 375-megawatt (MW) San Nicolás power station located in Buenos Aires. The plant was commissioned in 1983 and is scheduled to be retired in 2026. Argentina's most recent project is the 240-MW Río Turbio plant, which has two 120-MW units. The plant sources coal from the Río Turbio coal mine.

How many coal reserves does Argentina have?

Argentina has relatively small coal reserves compared with its reserves of other fossil fuels and they are primarily located in the provinces of Santa Cruz, Río Negro, and Neuquén in southern Patagonia, especially in the Río Turbio area. As of 2023, Argentina held approximately 882 million short tons of proved coal reserves.^{57,58}

The Argentine Renewable Energy Chamber (CADER) is set to formally update its institutional name to explicitly include energy storage among its strategic priorities. While keeping its ...

Argentina's energy system, much like a overworked tango dancer, keeps stumbling when the heat is on. But here's the twist: the country is now charging toward energy storage solutions like ...

The Energy Storage industry in Argentina presents a dynamic landscape shaped by various factors. Regulatory frameworks are crucial, as the government has initiated policies to promote renewable ...

Argentina coal-to-electricity energy storage equipment manufacturer

In December 2023, the President of Argentina declared an emergency in the electricity transmission and distribution sectors because the equipment is outdated, the industry hasn't adapted to changing ...

Huijue Group offers industrial and commercial energy storage, PV-BESS -EV Charging, Off-grid / On-grid Microgrid, telecom site solutions, and home solar energy storage, ensuring ...

AAG will hold minority equity interest in three operational power plants upon repayment of the receivables. The plants are operated by SPVs controlled by the GenCos that contributed receivables ...

In a global context where energy storage is becoming critical for grid reliability and decarbonization, Argentina's over-subscribed tender illustrates the appetite for scalable, bankable ...

This article explores how cutting-edge factories in the region are reshaping energy storage capabilities while addressing South America's unique renewable energy challenges.

From Warsaw's snowy plains to Buenos Aires' sun-drenched landscapes, energy storage power stations are rewriting the rules of electricity grids. Let's unpack why these two nations are ...

Argentina's electrochemical energy storage market is in its early stages but is poised for rapid growth, driven primarily by lithium-ion battery systems. The market is fueled by the...
