-----

Explore temperature humidity test chamber in Brazil offering consistent results, high control accuracy, and support for diverse industry applications.

GL has designed climate controlled outdoor cabinets that house sophisticated electronic equipment, such as computers and servers consisting of microprocessors, fiber optic devices, Ethernet routers ...

With their highly efficient refrigeration system and outstanding thermal insulation, ESPEC's constant climate cabinets are ideal for use in laboratories and research facilities.

The lineup consists of six models, with two size variations, 105 liters and 206 liters, and four temperature/humidity ranges, to accommodate your needs.

Designed to meet the demanding requirements for precise humidity and stability, Advanced engineered design incorporates the latest in cabinet, refrigeration, temperature control and monitoring features.

Its  $\pm 0.002^\circ\text{C}$  constant temperature and humidity performance provides the ultimate solution for scenarios such as high-temperature aging tests of gallium nitride power devices and coupling precision ...

Protect moisture-sensitive materials with precision-controlled, ultra-low humidity environments. Ideal for storing components like PCBs, semiconductors, powders, and specialty materials.

Constant climate chambers are available in different sizes and with different temperature and humidity ranges. Before purchasing, you need to consider in detail the applications for which you need the unit.

The six-model lineup includes 105- and 206-liter models available in four temperature (humidity) ranges and
