This week, the process to obtain the permits required for the construction of 15 battery energy storage parks, with a total capacity of approximately 1 GWh, has been initiated.

The Bucharest Energy Storage Project has emerged as a cornerstone in Eastern Europe's push toward grid modernization. Designed to integrate renewable energy sources like solar and wind, this ...

Bucharest's completed energy storage tender marks a turning point for Eastern Europe's renewable energy landscape. This grid-scale battery project, now moving from planning to implementation ...

The contract signed by Simtel covers the supply of a battery energy storage system, as well as the design, construction, installation, commissioning, completion, and testing of the facility.

Recent data shows grid-scale storage projects in Eastern Europe grew 48% year-over-year, with chassis design being the critical differentiator between successful and underperforming installations.

This Bucharest energy storage record isn't just a local win--it's rewriting the playbook for urban sustainability worldwide. Let's unpack how they did it, why your city should care, and what ...

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities.

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry ...

Based on the EU context and planning a significant uptake of renewable energy sources in its electricity mix over the following decades, Romania must also develop a strategy for the ...

In an accelerated wave of investments, companies in Romania are combining battery energy storage systems

Bucharest's built energy storage projects

(BESS) with solar, hydro or wind energy, or building independent storage facilities.
