---

In Bulgaria, CWP is developing a portfolio of more than 1 GW of wind energy projects. This way we will contribute to the supply of affordable green energy, an accelerated replacement of expensive ...

Wind power generated 2% of electricity in Bulgaria in 2023. By the end of 2020 almost 1 GW of onshore wind power had been installed. It has been estimated that there is potential for at least another 2 GW by 2030. The total wind power grid-connected capacity in Bulgaria was 702 MW as of 2023. An energy island in the Black Sea has been suggested for joint development with wind power in Romania.

With its 52 Vestas wind turbines erected, the Kavarna project is the largest wind farm in the country. Saint Nikola Wind Farm significantly increases Bulgaria's capacity in the production of renewable ...

...

As of end-2021, Bulgaria had 701 MW of installed wind capacity, according to the Electricity System Operator (ESO). The country's largest wind park is the 156-MW St. Nikola wind farm which is located ...

At the end of 2024, Bulgaria's cumulative installed wind power capacity reached 714 MW (0.71 GW), which represents 15.1 % of the total installed renewable energy capacity in the country. The report ...

Listed below are the five largest active onshore wind power plants by capacity in Bulgaria, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...

List of wind farms in Bulgaria This is a list of wind farms in Bulgaria as of the end of 2015.

BGWEA brings together the majority of wind energy producers over 1 MW and companies actively engaged in the sector. BGWEA's members represent a major share of the total installed wind power ...

The study underscores the potential of wind energy to become a key contributor to Bulgaria's renewable
