Canberra developers Geocon converted the 1970s Juliana House building, the former home of the Commonwealth Department of Ageing, into a hotel. The developers aimed to secure a 4.5 NABERS ...

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar ...

By maximizing their use of "good" energy - produced by renewable systems and stored for use during off-hours - hotels will be able to significantly reduce their carbon

Summary: Explore how Canberra Industrial Park leverages advanced energy storage systems to optimize power reliability, reduce operational costs, and support renewable energy integration.

The Huijue Group Off-Grid Solution comprises three main components: photovoltaic systems, energy storage systems, and off-grid systems, enabling energy self-sufficiency.

This is the third edition of the Clean Energy Council's (CEC) half-yearly report monitoring the progress of the deployment of rooftop solar and behind-the-meter energy storage systems in Australia.

The Canberra CAES project isn't just local news - it's a blueprint for global energy transition. By combining proven physics with modern engineering, compressed air storage offers a pragmatic path ...

Canberra is taking bold steps towards a sustainable future, with recent initiatives set to transform how we generate, store, and use energy. Here's what you, as a Canberra resident, need to ...

A community-scale battery storage system with a 2500 kWh capacity designed for a resort in NSW to capture and store solar energy for peak-time use and grid support.

Canberra Hotel Uses 60kW Outdoor Energy Storage Unit

The objective was to expand renewable energy storage and future-proof Canberra's energy supply. The project aims to deliver the next stage of the Big Canberra Battery by establishing a large-scale ...
