Who owns the Asia-Pacific Data center server market?

The Asia-Pacific data center server market is moderately consolidated, with a few major players, such as Dell Inc., Hewlett Packard Enterprise, Fujitsu, and Lenovo Group Limited. These major players, with a prominent market share, focus on expanding their regional customer base.

What is the growth rate of Asia Pacific server market?

Asia Pacific server market is growing significantly at a CAGR of 10.7% from 2024 to 2030. Based on enterprise size, the large segment accounted for the largest market share of over 65% in 2023 in the market. By product, the rack segment accounted for the largest market share, over 37%, in the market in 2023.

What is the upcoming IT load capacity of Asia-Pacific Data Center construction?

The upcoming IT load capacity of the Asia-Pacific data center construction market is expected to reach 23K MW by 2029. The region's construction of raised floor area is expected to increase 74.5 million sq. ft by 2029. The region's total number of racks to be installed is expected to reach 4.2 million units by 2029.

What is a scalable rack server?

Scalable rack servers that have a high level of flexibility and are optimized for demanding applications in the data center. Rack density from 1U to 5U, servers are designed for single and multi-socket options for x86 processors from AMD and Intel as well as for ARM processors from Ampere. Cannot find any model.

Modular rackmount servers for enterprise data center workloads, available from 1U to 5U and supporting AMD, Intel x86, and ARM processors for scalable, reliable performance.

2U Rack Mount Servers - 2U Storage Servers - Single or Dual CPU Largest range of 2U rack mount servers available - Supermicro base, Supermicro A+ / Ultra, ASUS & Gigabyte solutions

It is a hardware unit installed inside a rack, having a central ...

Presently, share of these two segments is estimated to be around 67.7% in the overall Data Center Rack Server market in 2020, and is anticipated to reach 69.6% by 2030.

Central Asian Five Countries Server Rack 2MWh

This escalating demand for high-performance computing is encouraging investments in data center racks and enclosures that offer enhanced cable management, airflow control, and ...

Numerous cloud service providers, along with sectors like IT and telecom, healthcare, banking, financial services & insurance (BFSI), and government and defense, are modernizing their server capabilities ...

We have included analysis of top performing countries such as (China, Japan, South Korea, India, Australia, Singapore, Taiwan, South East Asia, Rest of APAC) and their Market segmentation by ...

The market for data center racks in the Asia-Pacific region is expected to expand quickly due to factors like rising data traffic, improved energy efficiency, and the expanding demand for the development of ...

Based on countries, the market is segmented into China, Japan, India, South Korea, Singapore, Malaysia, and Rest of Asia Pacific. The market research report covers the analysis of key stake ...

It is a hardware unit installed inside a rack, having a central processing unit (CPU), storage, and other electrical and networking equipment, making them powerful computers that ...
