The 100kWh lithium battery energy storage cabinet offers high efficiency, flexibility, scalability, and reliable performance. The ingress protection rate of the 100 kilowatt hour battery is IP45, we support ...

Elecod Alice Series Container Electrical System is specifically designed for applications like ground-mounted energy storage power stations or commercial and industrial power stations.

Compatible with various EV models and charging standards, offering wide application versatility. Intelligent management ensures efficient charging and enhances system longevity.

This charging cabinet, also known as a Wall Box (WB), is often equipped for 1 Charging Point (1PDC) with AC power ranging from 3.7 to 22kW (normal to accelerated charging).

DC wallboxes charging landscape. This advanced technology enables bi-directional charging, allowing electricity to flow from the vehicle's battery back to the grid, effectively turning the vehicle into an ...

This energy storage cabinet boasts an advanced All-in-One integrated technology, seamlessly combining PCs, inverters, Battery Management System (BMS), and Energy Management System ...

Multi-level battery protection system, impeccable safety: features both grid power and backup power interfaces to ensure uninterrupted power supply for critical loads. Features black start ...

Perfect for factories, data centers, EV charging stations, and microgrids, this plug-and-play ESS cabinet provides peak shaving, backup power, and renewable energy optimization --all in a compact, easy ...

These are self-contained charging stations that include all the necessary components, such as the charger, power electronics, and communication systems, in a single enclosure. They are ...
