What does the Danish Energy Agency do?

The Danish Energy Agency publishes catalogues of technology data for energy technologies. Technology Catalogues provides information about technology, economy and environment for a number of energy installations and are among other things used by the Danish Energy Agency for energy projections.

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

What is the energy storage technology catalogue?

This technology catalogue contains data for various energy storage technologies and was first released in October 2018. The catalogue contains both existing technologies and technologies under development. The catalogue contains data for various energy storage technologies and was first published in October 2018.

Can Denmark deliver to a green transition in energy storage & conversion?

But if Denmark really shall deliver to the green transition within energy storage and conversion, in times characterized by extreme pace and changeability, we must stand together and walk together. DaCES ensures the necessary cohesion that makes it happen. Lars Ottosen, Head of Department and Professor, AU Biological and Chemical Engineering

The other means compressed air energy storage (CAES), Electricity storage in batteries and use of hydrogen (electrolysis-based) in the transport sector will not directly affect the CHP-ville plant but ...

In this project Ea Energy Analyses participated in a pre-feasibility study on whether investing in a pit thermal energy storage (PTES) in Roskilde would be financially attractive.

This article explores cutting-edge energy storage solutions, their applications across industries, and why Danish projects set global benchmarks. Learn how advanced storage systems enable grid stability ...

# Danish energy agency energy storage project database

In the report "Status, Strengths, Synergies - DaCES" report on energy storage in Denmark 2023," the center presents 17 recommendations across five areas: thermal energy storage, batteries, PtX, ...

The Danish Energy Agency publishes catalogues of technology data for energy technologies. Technology Catalogues provides information about technology, economy and environment for a ...

Energinet has a lot of energy data and through Energi Data Service, we want to make these data available. The portal will be expanded regularly. We hope you will join us on the journey, and will ...

DaCES is a unique platform within energy storage and conversion where Danish universities and companies work closely together to develop disruptive technologies and training courses, among ...

The technology catalogues form a knowledge base for energy analyses, projections and policy development in Denmark. Explore the catalogues to find detailed, comparable information that ...

This technology catalogue contains data for various energy storage technologies and was first released in October 2018. The catalogue contains both existing technologies and technologies under ...

Danish Ministry of Finance Data source for financial public investment analyses (in collaboration with the Ministry of Climate, Energy and Utilities)
