---

Our expertise spans HV interconnection substations, MV distribution systems, and full-scale data center infrastructure, ensuring seamless integration, scalability, and operational efficiency.

Tailored for energy wholesalers, system integrators, and commercial project developers, this 400V lithium-ion energy storage cabinet is a turnkey solution for peak shaving, load shifting, and ...

The rapid development of AI has imposed higher requirements for computing power on data centers. To accommodate more GPUs for computing, the architecture of 400V independent ...

NetSure™ 700 Series with 400V DC Input 8V DC near the equipment loads. This lets you use existing 48V DC equipment loads while gaining the copper-saving benefit of 400V DC

The push for 400V DC was further fueled by the need to support high-density computing environments, where AI workloads require substantial power with minimal losses.

Battery Energy Storage Systems (BESS) are emerging as a critical component of modern data center infrastructure. By providing service to your operation's power grid, as well as secondary backup ...

Currently three companies have worked together to provide a high-level overview of the Diablo 400V architecture. The goal is to standardize items such as, high voltage connectors and ...

Vertiv's Excellence 100Ah 12V and 200Ah 6V battery block range provides most long lasting-, reliable-and energy dense top/front terminal float application batteries that can be fitted in 400mm depth ...

Combined with the company's 480V Edge power architecture, OmniOn can now provide a comprehensive offering for global data center companies, regardless of region or available AC utility ...
