Does DRC have a mini-grid strategy?

The World Bank Group is working with the government on DRC's strategy on mini-grids and increased focus on delivering mini-grids at scale in the country.

How many people in eastern DRC will have access to electricity?

As a result, over 28,000 households and businesses in eastern DRC will have access to more affordable and reliable electricity. "Though it was a complicated transaction, MIGA worked diligently to innovate and provide guarantees to de-risk this mini-grid investment," said Jessica Stiefler, Senior Underwriter and Distributed Energy Lead at MIGA.

Why is infrastructure development so difficult in DRC?

However, persistent conflicts and a challenging political and economic environment have made infrastructure development difficult. With an electrification rate of just 19%, DRC has the second-highest number of people globally -- about 77 million -- without access to electricity. Less than 2% of rural areas are electrified.
