Built on the successful KabinPLUS platform, KS Series seismic cabinets are designed to keep information technology equipment safe in facilities located in areas with high earthquake risk.

KabinPLUS KS 19" Data Center Seismic Rack Cabinets have been designed to offer high flexibility and efficiency with a robust and anti-seismic core construction for data centres to handle Zone 4 ...

Seismic Rack Cabinets are engineered to protect critical IT and networking equipment in earthquake-prone areas. Built with reinforced construction, they offer stability, durability, and reliable ...

It is designed for secure, high density server and networking applications in IT environments that are earthquake prone or subject to regular vibration, such as an airport or factory.

Our EZ Seismic Cabinet is a tested, high-capacity solution engineered to keep mission-critical hardware protected, organized, and secure in even the most demanding seismic environments. When most ...

Highjoule's Outdoor Photovoltaic Energy Cabinet and Base Station Energy Storage systems deliver reliable, weather-resistant solar power for telecom, remote sites, and microgrids.

Solid sided construction, 2 pair of fully adjustable mounting rails, Seismic bolt down base with cable access holes, top panel with cable access holes. For high-density deployments, a seismic rated ...

For Optical Distribution Frame installations, DCX Seismic Cabinets are fully configurable, front-access cabinets that serve as a high-density fiber interconnect or the main building block for a large fiber ...

Protect IT and server equipment with earthquake-resistant, durable, and stable racks. Explore customizable options designed for data centers and high-vibration environments.
