Led by these two institutions, the Institute has all the capabilities needed to offer storage solutions at any scale, including innovative rechargeable batteries, an efficient hydrogen economy, and carbon ...

Here, you can find a list of cutting-edge equipment and the various tests and services available as part of the institute's activities.

A first-of-its-kind initiative, the National Institute for Energy and Electrochemical Storage, was inaugurated at Bar-Ilan University in partnership with Israel's Technion Institute. It aims to ...

Bar-Ilan University and the Technion have been selected to establish a national research institute in the field of energy storage. According to the Ministry's announcement, its goal is "to strengthen Israel's ...

Sodium-based batteries for storing renewable energy cheaply and the recycling of lithium-ion batteries are among the challenges to be researched at a new NIS 130 million (\$37 million) ...

The facility brings together energy researchers and partners from academia and industry in state-of-the-art laboratories for the development of prototypes of clean energy storage devices ...

Bar-Ilan University and the Technion - Israel Institute of Technology have won a call published by the Ministry of Energy for the establishment of a national research institute in the field of ...

The institute--Israel's first of its kind--is set to play a central role in developing energy storage technologies, supporting groundbreaking academic research, and serving as a launchpad for ...
