-----  
Are electric vehicle and battery storage projects being impacted?

The electric vehicle and battery storage spaces have been particularly hard-hit, with 11 and 16 projects affected, respectively. Five projects -- or the equivalent of \$6.7 billion of lost investment -- were downsized or cancelled in June alone, all of them in the electric vehicle or battery storage manufacturing space.

How many projects have E2 canceled?

E2, which has been tracking new investments in manufacturing and large-scale energy projects, is now expanding its regular reports to include project cancellations, shutdowns, and downsizings as well. From August 2022 to the end of 2024, 18 projects were canceled, closed, or downsized, according to E2's data.

Are two Department of Energy Labs mulling budget cuts?

Meanwhile, two Department of Energy-run national labs are reportedly also mulling cuts. Politico reported last week that the labs are considering laying off more than 3,000 scientists and staff in light of the threat of President Trump's budget cuts.

More than \$14 billion in clean energy investments in the U.S. have been canceled or delayed this year, including an Arizona project for a massive battery plant in the West Valley.

In recent months, however, some of the planned capacity has been delayed, put on hold, or even cancelled due to weaker-than-anticipated EV demand growth and the impact of policies ...

Battery, solar, and wind projects are getting killed in record numbers. Here's a map of all the cancellations so far this year.

Over 20 GWh of planned energy storage cell production capacity for 2028 has been canceled this year, according to reports compiled by the US Energy Council (CEC). These projects ...

Since federal clean energy tax credits were passed by Congress in August 2022, a total of 53 announced projects have been cancelled, closed or downsized. More than 21,000 jobs and ...

## Energy storage projects have been suspended

More than 20 GWh of planned energy storage cell production capacity, for 2028, has been cancelled this year according to Q2, 2025 reports on energy storage supply, technology, policy, and ...

More than \$14 billion in clean energy investments in the U.S. have been canceled or delayed this year, according to an analysis released Thursday, as President Donald Trump's pending megabill has ...

As project developers scramble to adapt, one thing's clear: the era of "build first, ask questions later" in energy storage is officially over. The projects that survive this shakeout will likely set new ...

Five projects -- or the equivalent of \$6.7 billion of lost investment -- were downsized or cancelled in June alone, all of them in the electric vehicle or battery storage manufacturing space.
