The second set of images captures the fully operational solar PV system in place at Agazi Health Center, highlighting the significant enhancement in energy supply and infrastructure.

The newly installed solar system provides Mudula Primary Hospital with stability and reliability: it enables the hospital staff to focus on their day-to-day operations and allows patients to ...

This paper embarks on a comprehensive exploration with the overarching objective of designing, modeling, and simulating an off-grid power system tailored for the Shinshicho Primary ...

The project aims to provide 167 sets of off-grid solar power generation systems for the Ministry of Health in Ethiopia, which are installed in 167 rural hospitals in rural areas throughout the country.

SCU provided a 1MWh/200kW energy storage system off-grid solution for a hospital in Africa, which enabled the hospital to eliminate the high cost and noise problems of diesel generators.

In a groundbreaking move to strengthen healthcare in remote areas, 300 healthcare facilities across Ethiopia will be powered by solar energy, benefiting an estimated 6.7 million people.

In response to the urgent demand for reliable energy in health care facilities, the Ethiopia Ministry of Health, Gavi, the Vaccine Alliance (Gavi), UNICEF and WHO today officially launched the...

Three hundred health care facilities have been prioritized for solar expansion across all regions in Ethiopia, focusing on facilities that are distant from the main power grid.

In 2022, Little Sun partnered with We Care Solar to provide five off-grid health facilities in rural Ethiopia with solar electricity to power lighting, mobile communication, small medical devices, ...
