-----  
What is 4th power?

Fourth Power's power-dense system stores electricity at the lowest cost, ten times cheaper than lithium-ion. We deliver power at costs lower than new natural gas, reducing energy bills for American families and businesses. Inexpensive carbon blocks are used to store energy at record-breaking temperatures.

Does fourth power offer a modular storage system?

Fourth Power offers a modular storage system that grows with the grid, enabling our customers to start with the storage duration they need today and add more capacity as requirements evolve. Adding duration to a Fourth Power system costs only a fraction of the initial installation, maximizing value for utilities and ratepayers.

What makes 4th power a good energy storage system?

Each subsystem of Fourth Power's thermal battery is separately housed - this allows energy and power to be scaled independently. The materials that comprise our energy storage system do not experience corrosion at any temperature. In fact, our founder's first design decision was to choose highly compatible materials: graphite (carbon) and tin.

Does hubspace need a hub?

Thanks for your question, it is HubSpace brand, HubSpace requires no additional hub or complex pairing--just connect the power strip to your home WiFi (2.4GHz, widely compatible with US routers) and download the free HubSpace app.

Unlike other RV power solutions, Power Kits combine five components into one Power Hub that deals with all your power needs, saving you space, money, and set-up hassle.
