Will NRRP support Romania's battery and solar photovoltaic manufacturing sectors?

The Ministry of Energy has recently announced a call for proposals to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, worth EUR199 million and funded through the NRRP.

Does Romania have a solar PV market?

Our sister site PV Tech has covered Romania's solar PV market extensively. The Ministry also announced a EUR199 million call to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, also funded through the NRRP, with EUR149.25 million for new battery production, assembly and recycling facilities.

How does the Romanian solar energy industry work?

When exploring the solar energy industry in Romania, several key considerations come into play. The regulatory framework is an essential aspect, as the Romanian government supports renewable energy through various incentives, including feed-in tariffs and green certificates.

How to develop a solar plant project in Romania?

The first step in developing a solar plant project in Romania is to secure a title over the land. The most common title, besides the ownership title, which gives right to build and own the respective infrastructure for a solar plant project, is the superficies right.

The Ministry of Energy has recently announced a call for proposals to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, worth EUR199 million and funded through the ...

The objective of the call for projects is to put into operation a capacity of at least 240 MW (or 480 MWh) of electricity storage in batteries, until June 30, 2026, contributing to the achievement ...

Get Your Free Solar Consultation Today! Start saving with clean, renewable energy - request your custom quote now.

Get tailored consultation and projects to meet your specific photovoltaic needs with Solarplants. Solarfarm can source PV projects whether operational, turnkey offers or project rights according to ...

Free DC Consultation for Romanian Photovoltaic IP66 Battery Cabinet

Eligible are the acquisition of facilities/equipment for building new electric energy storage capacities in batteries and the constructions that are the subject of the battery electric energy storage ...

In 2022, Romanian Ministry of Energy launched a state aid scheme supporting of investments in building manufacturing capacity for production, assembly and recycling of batteries, ...

Green Seiro specializes in the installation and consulting of photovoltaic solar energy systems, offering free consultations to help clients find the best solutions.

In January 2024, the Romanian Ministry of Energy has put on public consultation two call for projects on support for investment in new electricity production capacity from renewable energy ...

The Ministry of Energy of Romania has reopened a competitive solicitation for battery storage for the grid integration of renewable energy, seeking "at least" 240MW and 480MWh of ...

Our team is specialised in identifying and developing medium to large scale photovoltaic energy power plant sites and stand-alone storage installations. The mix of our passion and experience has ...
