What support has been provided for long duration Electricity Technologies?

For long duration electricity technologies, previous support has been provided via the LODES competition, supporting projects with a TRL from 4 to 7 to aid innovation in this sector.

Will government finalise a cap & floor mechanism for energy storage & flexibility?

Our work in energy storage and flexibility calls on Government to finalise the cap and floor mechanism to support long-duration electricity storage and design. We're identifying and working through challenges the industry faces when trying to combine renewable, storage and flexible technologies in one place.

What are the pre-qualification criteria for energy storage?

This pre-qualification criteria have been established by considering criteria of schemes such as Interconnectors Cap and Floor, Contracts for Difference and the Capacity Market, as well as the Longer Duration Energy Storage Demonstration Programme. This should ensure that novel technologies are not unfairly penalised through these criteria.
