-----

Discover all statistics and data on Global solar energy outlook now on statista !

The data is collected from multi-country datasets (EIA, Eurostat, Energy Institute, UN) as well as national sources (e.g China data from the National Bureau of Statistics).

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market, ...

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global ...

Remarkably, this annual capacity represents over 15% of the total global cumulative capacity and is nearly the equivalent of the second largest cumulative capacity: Europe. This once again ...

With the help of charts and key statistical data, we reveal the latest 2026 solar power statistics that demonstrate how the industry has grown and...

It covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities greater than 20 ...

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

A comparison of the solar power status among countries and territories has been provided, considering their concentrated solar power and PV installed capacities for each continent.

With China implementing major changes to its solar market design this year, a temporary dip in global growth

in 2026 appears very likely. Meanwhile, other regions are falling behind, ...
