Can solar power solve Cuba's energy problems?

In a nation with plentiful sunshine,Cuban officials have long had the opportunity to encourage solar power as one solution to national energy problems. But October's sweeping outages -- the island's worst power failure in years -- show little progress has been made.

Did a power plant fail in Cuba?

A man drives his American classic car during a massive blackout after a major power plant failed in Havana,Cuba,Friday,Oct. 18,2024. (AP Photo/Ramon Espinosa) HAVANA (AP) -- Millions of people in Cuba were left without electricity for two days after the nation's energy grid went down when one of the island's major power plants failed.

Is Cuba a good candidate for solar?

Besides the strong sunlight,there is another way that Cuba is a good candidate for solar. A significant share of its electricity comes from smaller power plants distributed around the country. Solar could be added or switched out in those locations. But it hasn't happened yet.

How many solar projects are there in Havana?

On the island,technicians are working to install 26 solar projectsin different provinces,López told official media last week. Installations will ramp up fivefold over the next decade,said Lídice Vaillant,head of the Photovoltaic Research Laboratory at the University of Havana.
