Could Chinese solar power inverters destabilise power grids?

Solar panels are seen with a view of the neighbourhood and lower Manhattan in New York in this August 2022 file pic by Reuters. Western nations have raised a security alert after US experts found "rogue communication devices" in Chinese solar power inverters, amid concern they could be used to destabilise power grids.

Are Chinese solar power inverters Rogue?

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S experts who strip down equipment hooked up to grids to check for security issues, the two people said.

Can China control solar inverters connected to foreign power grids?

This gives the Chinese Communist Party potential control over Chinese-made inverters connected to foreign power grids. In November, China disabled solar inverters in the U.S. and other countries, highlighting the risk of foreign influence over local electricity supplies and causing concern among government officials.

Are Chinese-made solar inverters a security risk?

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters.

It's not yet clear how many of these communication devices were found, nor the nature of the devices themselves - and the intent behind the planting of these is unknown.

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of them said. ...

The European Solar Manufacturing Council estimates over 200 GW of European solar power capacity is linked to inverters made in China - equivalent to more than 200 nuclear power plants.

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

How many solar-powered communication cabinet inverters are there in china

One expert said that over the past nine months, devices such as cellular radios have also contained undocumented communications devices, along with some batteries manufactured by ...

The European Solar Manufacturing Council estimates over 200 GW of European solar power capacity is linked to inverters made in China - equivalent to more than 200 nuclear power plants.

In November, an unknown number of solar power inverters in the U.S. and elsewhere were disabled from China. Some utility companies, including the Florida Power & Light Company, the ...
