What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

Who makes outdoor Telecom cabinets?

Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies, utilities, and network operators with BABA-compliant solutions that protect critical equipment from the harshest environmental conditions.

Are IP55 cabinets better than IP56 cabinets?

IP55 cabinets are more cost-effective and suitable for standard applications. IP56 cabinets are more expensive but necessary for harsher environments. IP56 cabinets offer better long-term protection, reducing maintenance and replacement costs in challenging environments. Summary

What are AP MiniFort® weatherproof enclosures?

Our compact, lightweight AP MiniFort® weatherproof enclosures offer flexible mounting options -- pole, ground, or wall installation -- and provide cost-effective protection for virtually any outdoor telecom application. This multifunctional outdoor enclosure offers integrated side, front, and rear access.

Whether you need a compact fiber distribution unit or a large UPS enclosure, each outdoor telecom box can be configured to support integrated power, fiber optic, and data systems within our facility.
