Who makes outdoor Telecom cabinets?

Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies, utilities, and network operators with BABA-compliant solutions that protect critical equipment from the harshest environmental conditions.

What is an outdoor telecom enclosure?

Our outdoor telecom enclosures support a wide range of telecommunications and infrastructure needs: Fiber Optic Networks: From compact fiber distribution units to high-capacity data center enclosures like the AP-Data with six slack frames, our cabinets manage dark-fiber volumes with organized cable management and secure slack storage.

Where are outdoor Telecom enclosures made?

Every outdoor telecom enclosure we manufacture is designed, fabricated, and assembled entirely in the USA. Our commitment to American manufacturing means you receive consistent quality, faster lead times, and complete Build America, Buy America (BABA) self-certification documentation with every order.

Power cabinets in hybrid systems ensure reliable energy flow, protect telecom equipment, and optimize renewable energy use for cost and eco benefits.

No matter what your application, LongXing has the resources and experience to understand the requirements and to design and build a product to meet the most stringent standards.

This Hybrid Outdoor Telecom Enclosure is a fully integrated, weatherproof cabinet designed to house telecom power systems, batteries, and network equipment in outdoor environments.

Whether you need a compact fiber distribution unit or a large UPS enclosure, each outdoor telecom box can be configured to support integrated power, fiber optic, and data systems within our facility.

We provide superior outdoor enclosures that are ready for installation. Fill out our registration form or call us at 904-674-2976 to learn more about our products and customization services.

Hybrid outdoor telecom cabinets for port terminals

Westell offers secure, weather-tight outdoor network enclosures to protect electronic equipment for outdoor telecom networks.

By combining thermal regulation with physical security, these cabinets protect sensitive network assets in unmanned locations while ensuring continuous service availability.

Learn how advanced outdoor telecom cabinets enable future-proof networks by supporting evolving technologies, modular upgrades, and scalable infrastructure deployment.

Canovate Hybrid outdoor enclosures offer a compact, all-in-one solution for telecom, integrating OLT, power, fiber, and cooling.

Designed to save deployment cost and time, our innovative solutions include hub collapse, battery backup, composite mounting platforms and modular series cabinets.
