With energy prices on the rise and mounting environmental obligations, Irish businesses are seeking reliable and future-proof, cost-effective solutions to fuel their growth sustainably. Earlier this year, ...

As opposed to short duration storage that mainly provides system services, LDES allows for storing and dispatching energy on-demand rather than letting surplus renewable energy go to waste and using ...

The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030.

Analysis being conducted by ESI suggests that Ireland is going to need up to seven times more energy storage than what is being stored today. "That said, the Government does realise that, ...

EirGrid, the transmission system operator (TSO) for the Republic of Ireland, has launched a consultation outlining how it will procure its first long-duration energy storage (LDES) capacity.

A well-designed industrial energy storage system in Ireland not only improves energy efficiency but also supports renewable integration for solar and wind projects.

While there are technical and geographical constraints for certain technologies, three technologies suitable for implementation in Ireland are battery storage in the short term, pumped storage hydro in ...

Energy Storage Ireland (ESI), the industry body representing the energy storage sector in Ireland, has called on the Irish grid operator EirGrid to deliver the Government's target of 500 MW of ...

The Government has said it wants to ramp up long-duration energy storage significantly, yet the proposed minimum procurement of 201 MW is still well below its 2030 goal of 500 MW. ESI is ...

EirGrid has opened consultation on its proposed procurement model for LDES, setting out how such storage
