The owner's manual recommends brake fluid flush every 3 years. Other places I have read/heard this is overkill. What do you guys think? What do you pay for it?

Good evening Accord Drivers, My car's wheel was making noise while driving yesterday and it was getting worse. I saw that the brake shield was coming off and finally came off this morning. ...

While all battery management systems are designed to protect and monitor batteries, not every BMS offers the same level of quality or reliability. A poorly designed or defective BMS can ...

First and foremost, the BMS is a safety feature. It shields your battery from common dangers that can shorten its life or cause it to fail. A lithium-ion battery is like a balloon. Overfill it ...

I've been researching mid-range (up to 10X) optics and notice some have an adjustable focus/parallax and some don't. I'm wondering what people here think at what point is it necessary? Is ...

Without it, even the best lithium battery could degrade quickly or fail catastrophically. A BMS typically performs three critical functions: Monitoring, Protection, and Optimization. Each is ...

Re: Why "breaking in" a barrel is NOT necessary The reason that the barrels change velocity is the bore actually work hardens and if you fire your rifles at say 500 yards you can see an ...

I was reading through the manual for our 2014 Honda Accord and noticed it recommended replacing the brake fluid every 3 years. I have owned three Hondas (1990, 1995, and currently a ...

Yes, you can use a battery pack with a higher Battery Management System (BMS) amp rating, but there are important considerations to ensure safety and optimal performance.

Is it necessary to upgrade the battery bms

In short, a BMS acts as the "guardian" of lithium-ion and LiFePO4 battery packs, extending their lifespan and enhancing reliability. Not all lithium batteries are equipped with a BMS. ...
