Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

Can anti-dumping duties be imposed in importing countries?

If such dumping injures the domestic producers in the importing country, under certain circumstances the importing country authorities may impose anti-dumping duties to offset the effects of the dumping. National anti-dumping legislation dates back to the beginning of the 20th century.

Can non-dumped imports be treated as dumping?

Furthermore, dumping determinations are normally made on a producer-by-producer basis and it is therefore possible that certain producers are found not to have dumped. A conceptual issue therefore is whether such non-dumped imports may be treated as dumped in the injury analysis.

How do dumped imports affect prices?

With regard to the effect of the dumped imports on prices, the investigating authority must consider whether there has been a significant price undercutting by the dumped imports, or whether the effect of the imports has been to significantly depress prices or prevent price increases, which otherwise would have occurred.

Explore the trade landscape of Gabon, a Central African nation rich in resources and evolving economic policies. This guide covers essential import and export regulations, customs ...

The terms of trade for Gabon's exports generally deteriorated during the review period, mainly on account of a steady decline in the value of exports under the effect of declining prices and volumes of ...

We reduce the impact of climate change by campaigning to eliminate powerful greenhouse gases, improve energy efficiency in the cooling sector, and expose related illicit trade.
