---

Wind energy currently represents 4.3% of total electricity production in Latvia, compared to an average of 20% in Europe. In December 2024, Latvia set a new record for wind power...

The project, the country's largest wind project to date, will provide power to a regional grid that is undergoing an ambitious transition from dependence on fossil energy to renewable energy ...

This 59 MW wind farm will almost double Latvia's capacity and will be operational by the end of 2022. The expansion of onshore and offshore wind would benefit the Latvian economy.

There are currently 45 onshore wind projects with EIAs expected to be completed in 2025 (one EIA was completed in 2024). Without regulatory amendments, these projects will not have grid access in the ...

Onshore wind energy in Latvia Installed capacity - 137.4 MW Ongoing EIA for projects totalling to 12 GW Transmission grid reservations - 6+ GW; available grid capacity - 2GW Latvian State Forest ...

Latvia's renewable energy capacity has expanded significantly, led by the Daugava hydroelectric power stations as the main electricity source. In 2022, wind power capacity nearly ...

The Pienava project is the crowning achievement of our RES potential, which will be managed to the highest industry standards and will allow Latvian customers to enjoy locally ...

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in ...

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's north ...
