Utility-scale battery energy storage systems (BESS) are the enabling infrastructure that will support the continued growth of renewable energy sources such as wind and solar, essential to the ...

Located near London and immediately north of the former Tilbury coal-fired power station, the project has now begun delivering electricity to the national grid.

The project is on National Grid land adjacent to its 275kV Warley substation. It will connect directly to the London electricity distribution circuit and serve to balance supply and demand in London.

The 300MW Thurrock Storage project, developed by Statera Energy, is now energised and delivering electricity flexibly to the network across London and the south east.

A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in funding to ...

Long-duration energy storage (LDES) projects are at full capacity up to 2035, with offers issued partially based on when applications were made - the earlier ones took priority, and 5.6GW ...

London, UK - July 28, 2025 - Jinko ESS, global leading energy storage company and subsidiary of Jinko Solar Co., Ltd., has announced an agreement for a 140MWh grid-scale energy storage project ...

InterGen's storage project will become one of the largest in the world, topping the biggest single-site battery project currently, a 250MW site switched on in August in California by its ...

Welcome to London's energy storage revolution - where megawatts meet marmalade sandwiches in the most British way possible. The London energy storage case isn't just about ...

Ofgem has confirmed that 77 LDES projects, totalling 28.7 GW, have passed the first eligibility stage under

London grid energy storage project

its new cap and floor scheme. Of these, 71 projects (24.5 GW) are expected to ...
