What is the future of power generation equipment in Mexico?

The market for power generation equipment in Mexico is estimated to increase 1.05 percent from 2022-2023, while exports from the United States to Mexico are expected to increase 0.93 percent.

What is the national power system in Mexico?

Mexico's National Power System (Sistema Eléctrico Nacional or SEN) is one of the largest in the Western Hemisphere. It is comprised of nine regions, plus a binational electricity system in Baja California. Most of the nine regions are interconnected, forming the National Interconnected System (Sistema Interconectado Nacional or SIN).

How much electricity does Mexico use in 2022?

According to Mexico's National Power System Development Program (Programa de Desarrollo del Sistema Eléctrico Nacional or PRODESEN), the electricity consumption of the National Electricity System was 333,662 GWh in 2022, which represented an annual increase of 3.4 percent.

Are DACG mandatory in Mexico?

Scope The DACG are mandatory throughout Mexico. Generators, exempt generators, suppliers, transporters, distributors, entities responsible for load, and end users will be subject to the provisions as applicable. Integration of SAE and its modalities

Mexico's grid has faced challenges in integrating intermittent renewable energy sources, leading to curtailment and inefficiencies. By requiring co-located battery storage, the government ...

This transformation involves balancing state oversight with private investment to modernize the grid, integrate Battery Energy Storage Systems (BESS), also known as Sistemas de ...

These classifications provide a structured approach for integrating storage technologies into Mexico's electricity sector, improving grid reliability and efficiency. The CRE says that this ...

Mexican integrated energy storage cabinet connected to grid installment payment

The report explains that Mexican regulations define five storage modalities -linked to renewable energy plants, load centers, and independent solutions - and formally recognize these ...

Mexico's electrical power industry mainly offers opportunities for U.S. products, services, and technologies for energy efficiency, distributed generation, energy storage, small-scale renewable ...

On 7 March 2025, the Official Journal of the Federation published the final agreement of the Energy Regulatory Commission (CRE) that establishes the administrative provisions for the orderly and ...

The DACG's implementation will prevent the administration from refusing to grant permits to variable energy projects and it will allow SAE to offer related services.

The Storage Regulations contain rules on the applicability of interconnection and connection studies; the possible offers for the purchase and sale of electricity, capacity, and ...

CRE regulation integrates batteries, intermittency management and grid operation backup through energy storage. Electric energy storage has become a crucial component in the ...

The Mexican Energy Regulatory Commission (CRE) has introduced new regulations regarding the integration of electricity storage systems (EES) with the National Electric System (SEN).
