New grid-connected solar generation and battery storage systems in Chuuk and Pohnpei will help FSM meet its goal of 70 percent renewable electricity by 2030, while cutting greenhouse gas ...

The Federated States of Micronesia are investing in solar micro-grids and battery energy storage systems as well as capacity building to increase self-sufficiency and reduce emissions. [pdf]

In Micronesia, Yap island seeks bids on a 79 kW solar plus storage minigrid system. A new hybrid minigrid that will provide clean, reliable and efficient energy supply to residents of Tonga was ...

The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4.5GWh battery storage system. The project has commenced in November 2024.

A tender is open in Micronesia for the engineering, procurement and construction of hybrid solar minigrid systems at three villages on the Fefen Islands.

The utility on the Federated States of Micronesia (FSM) island of Yap is seeking bids to supply battery energy storage systems (BESS) and 79 kW of solar minigrid generation capacity.

An off-grid solar system is a stand-alone power solution that enables you to generate and store electricity without relying on the traditional power grid. This energy independence is particularly ...

The functioning of the proposed off-grid solar PV-wind hybrid system, augmented with a pumped hydro energy storage system, in an off-grid setting is presented through the following operational cases.

The small island nation of Palau in the western Pacific Ocean has moved a step closer to having what is said to be the largest ever microgrid spanning diesel, solar and battery energy storage.
