The application range of lithium battery module assembly production line is very wide, including electric vehicles, energy storage equipment, solar photovoltaic and other fields.

Our company has a new fully automatic lithium-ion battery module and pack production line this year. This production line can increase the company's output by 1.6Gwh per year.

Our company's self-innovated power battery cell assembly line, lithium battery module line adopt semi-automatic and fully automatic production process, which greatly improves the production efficiency ...

With the wide selection of sizes, you are able to configure your own pack quickly and easily using Frey's lithium-ion phosphate battery modules. The transparent design allows you to easily check or replace ...

Our company's self-innovated power battery cell assembly line, lithium battery ...

High performance Lithium-Ion NMC battery pack, with a built in battery management system (BMS). Drop-in fitment, enables seamless battery pack installation, providing a direct replacement solution ...

These battery cell module pack solutions ensure uninterrupted power supply, enhancing operational efficiency and reducing downtime in critical sectors. With a focus on sustainability and cost ...

Utilizing an industry-leading and diverse technological approach and full-stack self-development capabilities to address concerns such as safety, performance, and supply anxieties, creating a ...

As a leading battery cell manufacturer, we take immense pride in presenting our revolutionary Generation 4 Battery Pack. Designed to redefine energy storage solutions, our battery cell module ...

This battery cell module pack is easy to manage and maintain, user-friendly, energy-efficient, and environmentally friendly. The 48v 100ah lithium ion battery is used in various industries such as ...
