Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, energy storage will ...

Unsurprisingly, California, Texas and Florida make up the bulk of new installations. However, these states often generate more solar energy than the grid can accept.

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy ...

As investment in renewable energy generation continues to rise to match increasing demand so too does investment, and the opportunity to invest, in energy storage.

Based on a brief analysis of the global and Chinese energy storage markets in terms of size and future development, the publication delves into the relevant business models and cases of new energy ...

Close to half of all battery storage projects are paired with solar or wind energy projects as part of their symbiotic relationship.

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

"We're excited about this joint development agreement, which will enable Entergy to provide our customers with low-cost, renewable energy as demand grows across Arkansas, ...

As part of the new airport's build, Daxing has an integrated project within it combining solar power generation with energy storage. This ensures a stable and sustainable energy supply for the ...

# New energy solar power generation and energy storage project investment

SHANGHAI, June 21 (Xinhua) -- U.S. carmaker Tesla on Friday inked a deal with Chinese partners to build a grid-side energy storage station in Shanghai using its Megapack energy-storage batteries.
