-----

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European ...

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

This innovative tool systematically catalogizes all energy storage projects within Europe, from the first planning phase to operational operation.

The report shows that utility scale systems have become the main engine of Europe's battery storage expansion, delivering 55% of all new added capacity in 2025 and marking a clear ...

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the ...

The EU installed a record-breaking 27.1 GWh of new battery energy storage system (BESS) capacity in 2025, with Germany and Italy topping the chart again, while Bulgaria emerged as ...

The EU, UK, Norway, and Switzerland together are expected to reach 100 GW of installed energy storage later this month, according to new analysis launched on Wednesday by LCP ...

The EU installed 27.1 GWh of new battery storage capacity in 2025, a new record year powered by strong utility-scale deployment, according to SolarPower Europe.

Discover the largest planned and under-construction battery energy storage projects in Europe as of mid-late 2025.

As Europe continues its transition to a more sustainable and resilient energy system, energy storage remains a
