Easily upgradable from 500kW to 1MW of energy storage, storing up to 3.8MWh of energy, enough to power an average 3,600 homes for one hour.

Delivers consistent, high-capacity power for a wide range of industrial, commercial, and renewable energy applications, ensuring optimal system performance and efficiency.

Plug-and-play container design allows for easy installation with minimal on-site labor. Features LiFePO4 batteries, a safe, reliable, and long-life energy source. Simple expansion by connecting multiple units ...

The 500kW storage converter is designed as an integrated solution, supporting simultaneous access to loads, batteries, grid or diesel generators, and photovoltaic, with a variety of operating modes and ...

The Microgrid System comprising four Galaxy 261 cabinets and an MPS microgrid hybrid inverter, builds on the advantages of full-function integration by combining EMS, PCS, and BMS in a compact design ...

The Sinexcel Micro-grid Console is a set of optional EMS software built within the HMI of PWS1 series inverter. It can also be replaced by any Compatible External EMS Energy Storage Inverter Model: ...

Isolated power supply for a safety-critical rudder control system. The complete power supply enclosure incorporates three redundant power supplies, each providing additional levels of triple-redundancy, ...

500kW power output with modular design, supporting expansion up to 1.5MWh (customizable based on your product specs). Seamless integration with existing inverters for hybrid energy systems.
