Is Ottawa looking at regulatory changes around battery energy storage facilities?

Ottawa is looking at regulatory changes around these types of facilities. (Ross D. Franklin/The Associated Press) UPDATED: City councillors unanimously approved the new rules for battery energy storage facilities at their meeting on Feb. 12, 2025.

Can a battery facility be built in Ottawa?

According to the new rules, companies looking to build a battery facility will have to show Ottawa Fire Services (OFS) that effective fire and safety risk management has been incorporated into the design. Companies will be required to install fire prevention and suppression systems, and provide OFS with site-specific training.

How do energy storage facilities work?

The facilities are big -- usually the size of several shipping containers -- so they're often built in rural areas. They work by drawing and storing energy from the grid during off-peak hours when demand is low, and discharging it back to the grid when needed.

The City, together with its partners, Ottawa Tourism and Ottawa Bluesfest, encourages residents and visitors to stay tuned for more details about the big day and other announcements ...

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry ...

The City of Ottawa's Agriculture and Rural Affairs Committee has voted to approve changes to the city's Official Plan that would set out the land use policy direction for building battery...

The Agriculture and Rural Affairs Committee in Ottawa approved Official Plan and zoning amendments to establish land-use policy for siting Battery Energy Storage Systems (BESS).

Workers check battery storage pods at a lithium-ion battery storage energy ...

Essentially, a BESS is a massive collective battery -- in this case a lithium ion battery -- to store electricity and
