How deep should a 1000mm cabinet be?

A 1000mm deep cabinet may have a max internal depth of 870mm. The internal depth you need should also take into account cable radius bend. Rack Width: decide if you need a 600mm or 800mm wide rack. 600mm is the standard for a 19inch server rack. 800mm provide extra width for cable management and air flow.

What is a server rack cabinet?

AZE's 48U 800mmWide x1200mmDeep server rack cabinet shall consist of welded and assembled steel frame construction, supporting computer server and data storage equipment by providing additional space at the rear for cable management and front-to-rear airflow solutions. Standard enclosure for low to medium density server and networking applications.

What is a 12U rack & data cabinet?

The 12U racks and data cabinets range from Server Room Environments covers standard rack mount IT applications for use in office, retail and warehouse environments to cabinets designed for extreme conditions and roadside enclosure protection.

How do I choose a 12U rack or cabinet?

When selecting a rack or cabinet there are several factors to consider. A 12U rack or cabinet can house equipment whose total height when placed into the rack is no more than 0.53m. Care therefore has to be taken when selecting a rack to make sure that there cabinet height is sufficient to house the IT server, networking peripheral or IoT device.
