Do industrial automation equipment need a control cabinet?

Automation technology, which functions using so-called programmable logic controllers to regulate the complete system logic, always has a control cabinet. Without such control cabinets, industrial automation equipment cannot work.

What support do you need for the construction of switch cabinets?

As with all our products, we also support you in the construction of switch cabinets - from conceptualisation and development, through design and initial prototypes, to series production and sales, if required. We require modern software solutions such as Eplan P8 for the development, simulation, planning and construction of the switch cabinet.

How will digitalisation affect switch cabinets?

The transformation of production into a smart factory and IIoT is also being significantly accelerated by the digitalisation of all technical areas - and with it the demands on the switch cabinets. In this way, the market trend towards miniaturisation is having an equal impact on the switch cabinets.
