7 This function uses both the `str.replace()` and `replaceAll()` functions. It will replace all occurrences of pattern in string with repl in a case-insensitive way.

ECMAScript 2021 has added a new String function `replaceAll`. A long time ago in a galaxy not so far away, people used `split + join` or regular expressions to replace all occurrences of a string. I ...

119 In order to replace text using regular expression use the `replaceAll()` function: `sub (pattern, repl, string [, count, flags])` It will replace non-overlapping instances of pattern by the text passed as string.

0 You can use the following function to replace Character or String at a particular position of a String. To replace all the following match cases use `String.prototype.replaceAllMatches()` function.

When replacing all occurrences of aba in ababa with ca, which result do you expect? caba? abca? cca?

The `string.replace()` is deprecated on python 3.x. What is the new way of doing this?

25 I need to replace a part of a string in Javascript The following example should clarify what I mean

160 If you want to replace multiple characters you can call the `String.prototype.replace()` with the replacement argument being a function that gets called for each match. All you need is an object ...

58 There's no need to use `replace` for this. What you have is an encoded string (using the `string_escape` encoding) and you want to decode it:

What's the difference between `java.lang.String`'s `replace()` and `replaceAll()` methods, other than the latter uses regex? For simple substitutions like, `replace . with /`, is there any difference?
