Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local media reported, ...

As a key element of the global energy transition, energy storage has become the next frontier. This enables the integration of renewable sources and ensures grid stability.

Romania should boost the power of its electricity storage facilities to 2,000 MW by the end of next year, so as to smooth the imports experienced these days during peak consumption periods,...

To meet the EU's 2030 renewable energy goals, an estimated 500-780 GWh of storage capacity is deemed essential. For Romania, this continental push underscores the urgency of scaling ...

With increasing penetration of variable renewable energy sources in Romania, grid flexibility and storage capabilities are becoming critical for stability. The shift by Electrica underscores ...

In November 2025, Aukera announced it had secured a EUR60 million debt facility from Kommunalkredit Austria AG to finance its first standalone battery energy storage system in Romania.

Romania's new EUR150 million (\$173.8 million) municipal storage program could add 385 MW of capacity and coincides with financing for one of the country's largest standalone battery ...

The largest battery energy storage capacity in Romania - 200 MW power and 400 MWh capacity - was operationalized on Friday, Minister of Energy, Bogdan Ivan announced.

In recent years, multinational capital investment in Romania's new energy sector has grown significantly, and is expected to lead 1.2-1.5GW of integrated landscape and storage projects ...

"I am pleased to announce that the Ministry of Energy is launching a new call for projects financed

Romania 2025 energy storage

through the Modernization Fund, aimed at investments in energy storage capacities (batteries).
