In Russia, plans are underway to develop infrastructure that supports EVs, requiring a robust energy storage capability that can handle the rising load on the electricity grid. The ...

Successful advancement of Russia's energy sector will hinge on accelerated commercialization of new technologies. We have identified three win-win moves and three strategic bets to make for Russia's ...

MKC Group of Companies is an official partner in energy storage devices built on CATL battery systems -- a world leader in the production of lithium energy sources for electric transport and energy.

Based on average daily power consumption statistics and load diagrams for various rig operating modes at more than fifty pads equipped with DPS, it was proposed to improve the energy efficiency of ...

Russian specialists will create about fifty new types of equipment and components for energy storage units within the framework of the federal project on development of energy storage...

Will storage systems be economically viable enough to become a widespread solution for installation in power sector?

Power systems around the world actively use electrical energy storage systems (ESS). Currently, Russia is developing normative and technical documentation with

In this article authors carried out the analysis of the implemented projects in the field of energy storage systems (ESS), including world and Russian experience.

Though at the center of Russia's hydrogen strategy prior to the invasion of Ukraine, hydrogen exports will face similar challenges as well as even greater technological obstacles, in that Russia's hydrogen ...
