-----

Access the interactive map here (shown above) of U.S. manufacturers of solar modules, mounting systems, power electronics and the battery supply chain.

The US boosted its solar module manufacturing capacity by a record 9.3 GW in the third quarter of 2024, with five new or expanded factories in Alabama, Florida, Ohio and Texas, bringing ...

The US solar manufacturing industry just hit a historic milestone: Domestic solar module production capacity has surpassed 50 gigawatts (GW). If all these factories ran at full capacity,...

India's solar module manufacturing capacity is set to rise significantly, reaching 160 GW by 2030--up from 80 GW in 2025. Solar cell manufacturing capacity is projected to grow from 15 GW ...

WASHINGTON D.C. -- The United States has reached a historic manufacturing milestone, surpassing 50 gigawatts (GW) of domestic solar module production capacity. At full ...

The solar energy landscape in the United States has reached a significant milestone, with domestic manufacturing capacity for solar modules exceeding 51.7 gigawatts (GW) as of February ...

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to ...

New data from the Solar Energy Industries Association (SEIA) shows that the U.S. now has more than 60 gigawatts (GW) worth of solar module-manufacturing capacity, a 37% increase ...

The Indian solar industry has 86GW and 182GW of solar cell and module manufacturing capacity, respectively, expected to be commissioned by 2027.

Solar cell manufacturing capacity increased from 1.2 GW in 2014 to 27 GW in 2025, while solar module

## Solar cell module capacity

manufacturing capacity rose from 2.3 GW in 2014 to 144 GW in 2025.
