---

Chile has reached fresh milestones in its energy transition amid a rapid build-out of solar and battery storage infrastructure. The context: The South American nation's brisk shift to clean ...

By storing excess solar generation and avoiding coal ramp-up, the project will significantly reduce CO2 emissions and increase the efficiency of Chile's renewable energy mix.

Both located in the heart of the Atacama Desert, the two facilities together will reach a total capacity of 452 MWp and a storage capacity of 2.5 GWh, ensuring an annual output of ...

Listed below are the five largest energy storage projects by capacity in Chile, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

November 24, 2025 - Enel Chile, through its subsidiary Enel Green Power Chile, has initiated construction of the Las Salinas battery energy storage system (BESS), part of an industrial-scale ...

The site, the first solar-plus-storage project built from scratch by Engie Chile, will feature 208 lithium-ion battery containers. Engie Chile wants 3.5 GW of installed energy capacity by 2027, ...

Solar power combined with battery energy storage is at the forefront of Chile's recent generation growth.

As global demand for renewable energy grows, Chile has become a laboratory for cutting-edge energy storage solutions. Let's unpack why this South American nation is suddenly the talk of ...

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage.
