U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

Global Repercussions The recent revelation that Chinese-made solar power inverters are playing host to rogue communication devices has set off alarm bells around the globe.

Power inverters, which are predominantly produced in China, are used throughout the world to connect solar panels and wind turbines to electricity grids.

Recent investigative reports have uncovered concerns in the renewable energy sector: rogue communication devices found embedded within solar power inverters and batteries, many of ...

Over the past nine months, forensic security teams have logged multiple brands of Chinese solar inverters containing hidden wireless communication equipment. Investigators have ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented ...

Experts have uncovered secret communication devices hidden in Chinese-made solar power inverters, raising

Solar-powered communication cabinet inverters will be connected to the grid in 2025

serious alarms about potential sabotage of U.S. infrastructure in the event of ...
